A'STAR JEWELLERY

IIJS 2016 - Hall 6, Booth # 6U032 to 6V035

A'Star Jewellery unveils its new collection MATRIX Bijoux for IIJS 2016. Based on the latest technology that redefines the entire process of product development, the collection is a visual feast of stunning geometries.

Every piece crafted is a complex 3D form; an intricate grid work of fine tailing and layering that is near impossible to replicate by conventional manufacturing.

The collection, comprising of earrings, pendant and ring sets in added 18kt yellow and pink gold, is big on look but at the same time extremely lightweight and affordable.
