Inspired by the intricacies of relationships, the link collection is all about the connections and bonds we form with others. The design style uses delicate links embellished with subtle cream enamel to symbolise the strong yet elusive bond of love. The links are featured in various shapes to portray the infinite forms of love. A scalloped rim in gold adds pizzazz to the link design. Available in two shades of gold – yellow and pink, in 9k to 18k, the diamond-encrusted collection offers an eclectic selection of pendant sets, necklace sets and oval bracelets. The designs are a balance of contemporary and fusion styles, offering the wearer the choice to accessorise with western as well as Indian attire.
